

K. Moody-Bierly and B. Field gave the Prevention Committee Report. The committee met recently on 9/21/07 and discussed changes to the newly proposed OCPP level. This level would fall between the RA and the OCPS I and was previously approved by the Board to require 1,000 hours of work experience and 40 hours of education. The committee would asked that the board consider reducing the work requirement to 100 hours and increase the education requirement to 42 hours. It was determined that the previous number of work hours would present a barrier to individuals seeking this level and that education requirements needed to be increased slightly to cover all necessary content areas. A sub-committee is continuing work on defining these content areas and will meet on 10/16/07. Board members raised questions of what the need for an RA and an OCPP were and if the levels would have the same scope. B. Field indicated that changes such as scope would be discussed after the statutory changes were implemented. He indicated that LSC was currently drafting legislation required to implement these changes.

MOTION: To reduce the work experience requirements for the newly proposed OCPP level from 1,000 supervised work hours to 100 supervised work hours and to increase the number of education hours from 40 hours to 42 hours.

K. Moody-Bierly, C. Ireland

Approved

The Board reviewed trends relating to prevention examination results now that the new exam has been implemented. Passing rates are up and the board staff will now be tracking demographic information of testers to attempt to identify patterns in why folks fail or pass the exam. The next Prevention Committee Meeting is 11/16/07 at CACY in Mansfield, Ohio.

B. Field gave the Treatment Committee report. He indicated that the committee met on 9/18/07 and welcomed new public members. Discussion surrounded the goals of this new committee. The committee tasked board staff with the creation of several options for revisions of treatment credentials requirements and scope. Their next meeting will be 10/30/07. D. Fidelibus asked if a co-occurring specialist could be add to the committee to bring that perspective. She and Bob agreed to work on this further.

A. Ferguson gave the Ethics Committee report. She indicated the committee met on 9/19/07 and reviewed several cases but did not have any action items to bring the board at this time.

B. Field gave the Executive Director's report. He reminded the board that they each needed to complete a state ethics training. The next training will be held 10/5/07 at 9 am at the William Green Building. The Governor's office may also set additional dates in November. B. Field shared that the CCDC I Regional Presentations were in full swing. Amanda presented to a crowd of around 150 at the Columbus presentation and is scheduled to present to 200 in Cleveland on 10/2 and 150 in Cincinnati on 10/5.

B. Field indicated that ODADAS is in its last year of its adolescent treatment grant and has asked the board to review whether or not it would be feasible/beneficial to add an

adolescent treatment credential or endorsement to our current levels. This matter will be referred to the Treatment Committee and/or a work group of that committee for review. B. Field reminded the board that the ICRC Fall meeting was coming up the last week in October and that he and Amanda would both be attending. He anticipates the CPM Exam to be the big topic of conversation.

B. Field indicated that four members would be up for re-appointment at the end of the year. The board still has two slots open from last year. One is an LICDC slot and the other the public member over 60 slot. B. Field indicated that a member was appointed to the LICDC slot but staff identified that this individual did not hold an LICDC and therefore was not eligible. The Governor's office of Board's & Commissions as well as the Senate committee who approves these nominations has been notified of the matter.

The Board took at lunch break from noon to 12:25 pm.

The Education Committee presented their accreditation training to the board and discussed ways to improve the presentation prior to presentation to the public participants.

The next Board meeting is 12/10/07.

MOTION to adjourn K. Moody-Bierly, D. Fidelibus
