

Ohio Chemical Dependency Professionals Board
March 2016

Proposed Rules Comment Period

You are receiving this message pursuant to the requirements of EO 2011-01K and Senate Bill 2 of the 129th General Assembly, which requires state agencies, including the Ohio Chemical Dependency Professionals Board, to draft rules in collaboration with stakeholders, assess and justify any adverse impact on the business community (as defined by SB2), and provide opportunity for the affected public to provide input on the rules.

The Board is conducting its Five Year Rule Review. This process allows the Board to review and evaluate each applicable rule for continued necessity of the rule and possible content modification.

The Board is recommending changes to the following rules:

- **4758-4-01 Formal Application for Licensure or Certification:** This rule outlines general procedures for applying for a license, certificate or endorsement with the Board. The Board is making several minor amendments to this rule in preparation for a transition from paper applications to online applications. Additionally, the Board is correcting a few typographical errors from prior submissions.
- **4758-8-01 Code of Ethics for Chemical Dependency Counselors:** This rule establishes the code of ethical conduct for chemical dependency counselors licensed by the Board. We are replacing the term “dual relationship” in this rule with “multiple relationship” to remain consistent with field standards. We are also clarifying that the private practice section is intended for independent licensees.
- **4758-8-02 Code of Ethics for Clinical Supervisors:** This rule establishes the code of ethical conduct for clinical supervisors licensed by the Board. We are adjusting terminology in this rule to standardize supervisor and supervisee language.
