Chemical Dependency  
Professionals Board

## **CHEMICAL DEPENDENCY SPECIFIC EDUCATION CONTENT AREAS**

The following subject matter represents content areas appropriate for chemical dependency specific education hours. Please utilize when filling out CD Specific Education Grid for *initial* application with the OCDP Board. See note at bottom for those renewing with the OCDP Board.

Educational Sponsors or Providers should utilize this document in determining content areas for courses/workshops/trainings for OCDP Board approved CEU hours.

Some educational courses may cover content that can be split into several content areas. Distribution of course hours cannot exceed the number of hours awarded by the education provider.

### **C1 - Theories of Addiction**

**This content area may include both theories of addictions as well as more general knowledge about substance use and the development of substance use disorders.**

*Information that meets this content area may include:*

- Contemporary and historical models and theories regarding substance use (and other addictive) disorders. Psychological approaches for explaining drug dependence, i.e. behavioral models, cognitive theories, personality theories, etc.
- Knowledge, terms and concepts related to theory, etiology, research, and practice
- Brain disease research and findings
- Knowledge of biological, psychological, social and spiritual aspects impacted by substance use and substance use disorders
- Understanding the difference between substance use disorders from other medical and psychological conditions
- Communications related to addiction use knowledge with individuals with substance use disorders and others affected by the substance use.

### **C2 - Counseling Procedures and Strategies with Addicted Populations**

**This content may include counseling theories, stages of change, evidence-based strategies and skills in effectively engaging with individuals with substance use disorders. The importance of cultural diversity, trauma informed and sensitive/delicate engagement strategies.**

*Information that meets this content area may include:*

- Evidence based counseling, integrated care & inter-professional strategies, engagement strategies, psycho-social interventions utilized in the treatment and relapse prevention of substance use disorders including but not limited to

- Motivational Interviewing, Cognitive Behavioral Treatment and MAT; development and utilization of recovery supports
- Significance of the stages of change in the treatment and counseling process
- Information to enhance cultural diversity, trauma sensitivity and recognition of the impact of cooccurring disorders in the treatment of substance use disorders
- Development of and importance of the therapeutic alliance
- Use of self in the counseling and engagement processes
- Elements indicative of a crisis and effective intervention strategies
- Professional issues including countertransference, boundary setting, and the therapeutic use of selfdisclosure

### **C3 - Group Process and Techniques Working with Addicted Populations**

**This content area includes information and skills needed to effectively utilize group as a treatment modality.**

*Information that meets this content area may include:*

- Understanding and providing psychoeducation that is applicable to client needs
- Group therapy as a treatment modality including models, types, stages, risks and benefits of group participation
- Group facilitation strategies and skills to increase positive clinical impact of the group in the individual change process
- Strategies to enhance cultural and trauma sensitivity in the utilization and facilitation of group

### **C4 -Assessment and Diagnosis of Addiction**

**This content area may include information about the screening, assessment, assessment tools, and data gathering to effectively determine the presence of a substance use disorder and the identification of client strengths and needs.**

*Information that meets this content area may include:*

- Screening, assessment and data gathering procedures
- Diagnostic interviewing emphasizing the impact of substance use on bio-psycho-social functioning
- Examination of both antecedents/precursors and consequences of substance use
- Use and interpretation of testing instruments for identifying psychoactive
- substance use disorders
- Knowledge of DSM criteria for determining diagnosis of substance use Disorders
- Criteria for determining appropriate treatment modality, specific interventions and recommended initial level of care, i.e. ASAM level of care
- Use of collateral data and other helpful information in the assessment process
- Recognition of the presence and impact of co-occurring disorders , their impact on the development of substance use disorders, and referral processes for further assessment and evaluation of co-occurring disorders
- Information required for a comprehensive assessment and how to properly document

## **C5 - Relationship Counseling with Addicted Populations**

**This content area may include information about family dynamics, impact of substance use on significant relationships as well as the development and implementation of effective family related education and counseling services.**

***Information that meets this content area may include:***

- The role of family, social networks, and community systems as assets or obstacles in treatment and recovery processes
- Methods and strategies for incorporating family and social dynamics in addiction treatment and recovery processes
- Knowledge of the impact of substance use on family and other interpersonal relationships
- Models and techniques to assess strengths and challenges of relationships and effective engagement strategies with family members and other significant relationships
- Educational or clinical needs of family members and other significant relationships
- Family dynamics, distress and dysfunction related to the presence of substance use disorders and/or other medical or psychological conditions

## **C6 - Pharmacology**

**This content area may include information about the effects of various psychoactive, synthetic and herbal substances of abuse; as well as prescribed pharmaceuticals used for treatment of addiction and mental and emotional disorders. Suggested minimum of 6 hours should include information about specific substances used in medication assistance treatment.**

***Information that meets this content area may include:***

- Pharmacology of medications used in Medically Assisted Treatment (MAT) i.e. Methadone, Suboxone, Vivitrol, etc.); naloxone training
- Importance of psychosocial interventions as part of Medication Assisted treatment protocols including withdraw management
- Pharmacodynamics of psychoactive, synthetic, herbal substances of abuse, and psychotropic medications used in the treatment of substance use disorders and psychological disorders
- The impact of various psychoactive substances on an individual's physiology, brain functioning, mental processes/perceptions, human growth and development, the development of tolerance and associated withdrawal symptoms

## **C7 - Prevention Strategies**

**This content may include current prevention theories and research, knowledge of prevention strategies, current behavioral health issues and research, and also self-care for clinicians working in chemical dependency**

***Information that meets this content area may include:***

- Knowledge of the Continuum of Care, Prevention approaches and Strategies, i.e. CSAP Prevention Strategies (Information dissemination, education, Alternative, Environmental, Community Based Processes, Problem Identification & Referral)

- Application of current prevention theory and research to inform best practice, i.e. developmental perspective/ stages, adverse childhood experiences (ACEs), resiliency factors, risk and protective factors, developmental assets associated with use and the development of substance use disorders.
- Social and cultural influences on the use of psychoactive substances
- Prevention and intervention strategies used with various groups identified by age, gender, ethnicity, sexual orientation, ability;
- Mental Health Wellness knowledge and strategies for self-care
- Current behavioral health trends and research, i.e. suicide and self-harm, bullying, gambling, violence, grief and loss, sexually transmitted infections, human trafficking awareness and prevention

## **C8 - Treatment Planning**

**This content area may include utilization of assessment information in determining appropriate level of care, the development of individualized treatment and relapse prevention plans, identification of appropriate clinical interventions, the evaluation and documentation of the effectiveness of treatment interventions.**

*Information that meets this content area may include:*

- Models and levels of care in the treatment of substance use disorders
- Criteria for admission, continuing care and discharge from various levels of care for the treatment of substance use disorders
- Development of individualized treatment plans utilizing individual challenges, strengths to address immediate and long-term needs to support recovery and preventing relapse
- Utilization of assessment information and the individual's stage of change in the development of an individualized treatment plan
- Communication to help clients/patients understand diagnosis to develop an individual treatment plan
- Skills needed to develop collaborative relationships with individuals with substance use disorders
- Identification of appropriate treatment interventions (i.e. individual, group counseling) to support immediate needs and relapse prevention strategies
- Case management models, services and referral processes to address needs that cannot be met within the current treatment arena
- Types and value of community support groups, i.e. peer support, AA, NA, CA
- Treatment Planning documentation standards

## **C9 - Legal and Ethical Issues Pertaining to Chemical Dependency**

**This content area may include information about ethical practices, and legal and ethical requirements that are applicable to the addiction profession. Common issues leading to and strategies to combat ethical violations including training, supervision, and documentation.**

*Information that meets this content area may include:*

- Specific knowledge of appropriate ethical codes and laws associated within the addictions counseling profession within scope of practice

- Accurate understanding of the social implications of diagnostic labels, such as avoiding **stigma** language, using person-centered language and the accountability of the profession to support
- Issues with Telehealth regarding confidentiality, and other ethical concerns

## **Professionalism in Gambling Treatment**

- Understanding administrative and clinical supervision as it relates to gambling disorder treatment
- Knowledge of client rights in gambling disorder treatment including confidentiality, informed consent, and non-discrimination
- Knowledge of counselor responsibilities in gambling disorder treatment including reporting duties, client welfare, inter-professional relationships and continuous quality improvement

## **LICENSE OR CERTIFICATE RENEWALS**

Please see OCDP website or OAC 4758-13 for Renewal Requirements, including Endorsement renewals . All courses that apply to the content areas **C1-C5** can be used to meet your CD specific renewal hour requirement. All content areas above can also be used in the R1 area for RENEWALS.

### **R1- Treatment Field Related**

**(Only can use R1 for Renewals; cannot be used for certification or licensure)**

**The content area is only used for Renewals and should only be used by those conducting education programs if the information is related to chemical dependency treatment but does not fit into any of the Content Areas above. Any certificates marked as R1 can NOT be used for education requirements for those applying for treatment certification or licensure; unless the applicant can produce the agenda and goals/objectives of the training, instructor bio, why they believe the R1 CEU could be applied to a specific Chemical Dependency Content area, and the Board makes an exception.**

*Educational providers are to list the number of hours and the content area of the material their course/workshop/training covers on certificates. As an applicant, you should keep agendas and descriptions to verify material was presented in the appropriate content area if you believe content could be applied in another content area than listed on the certificate.*
